During the meeting, attendees are provided information that will prepare you, your family and your property if a hurricane were to strike.

The first half-hour of the class will be presented by Bluffton Emergency Management Manager Lt. Christian Gonzales. He will discuss evacuation routes, procedures during an evacuation as well as answer questions.

The second half-hour of the class will be presented by Bluffton's Stormwater Management to discuss the new EPA-mandated portions of the Town's stormwater management program, as well as give advice to property owners on how to prepare their retention ponds and maintain the stormwater drainage system to help protect against flooding during storm events.
